Art Unit: 3627

DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to a method of enabling one of more participants to access online general ledger data.
 - II. Claims 7-13, drawn to a method of facilitating creation and storage of a reconciliation profile.
 - III. Claims 14-18, 27-32, 67-70, drawn to a method of forming a reconciliation document.
 - IV. Claims 19-26, drawn to a method of creating a reconciliation item.
 - V. Claims 33-44, drawn to a hosting system for hosting one or more clients.
 - VI. Claims 45-48, drawn to a computing system.
 - VII. Claims 49-55, drawn to computer-readable media.
 - VIII. Claims 56-58, drawn to an application program.
 - IX. Claims 59-65, 66, drawn to an electronic reconciliation profile.
 - X. Claims 71-74, 75-76, drawn to a user interface for an account reconciliation tool.
- 2. Inventions I and II, III, IV, V, VI, VII, VIII, IX, X are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at

least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as enabling one of more participants to access online general ledger data. See MPEP § 806.05(d).

- 3. Inventions II and I, III, IV, V, VI, VII, VIII, IX, X are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination II has separate utility such as facilitating creation and storage of a reconciliation. See MPEP § 806.05(d).
- 4. Inventions III and I, II, IV, V, VI, VII, VIII, IX, X are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination III has separate utility such as forming a reconciliation document See MPEP § 806.05(d).
- 5. Inventions IV and I, II, III, V, VI, VII, IX, X are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination IV has separate utility such as creating a reconciliation item. See MPEP § 806.05(d).

6. Inventions V and I, II, III, IV, VI, VII, VIII, IX, X are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination V has separate utility such as a source database to store source data pertaining to a financial account. See MPEP § 806.05(d).

- 7. Inventions VI and I, II, III, IV, V, VII, VIII, IX, X are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination VI has separate utility such as one or more processing units coupled to a memory. See MPEP § 806.05(d).
- 8. Inventions VII and I, II, III, IV, V, VI, VIII, IX, X are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination VII has separate utility such as adding a reconciliation item to the reconciliation document. See MPEP § 806.05(d).

Art Unit: 3627

9. Inventions VIII and I, II, III, IV, V, VI, VII, IX, X, XI are related as subcombinations

disclosed as usable together in a single combination. The subcombinations are distinct

if they do not overlap in scope and are not obvious variants, and if it is shown that at

least one subcombination is separately usable. In the instant case, subcombination VIII

has separate utility such as a first object class to organize account reconciliations. See

MPEP § 806.05(d).

10. Inventions IX and I, II, III, IV, V, VI, VII, VIII, X are related as subcombinations

disclosed as usable together in a single combination. The subcombinations are distinct

if they do not overlap in scope and are not obvious variants, and if it is shown that at

least one subcombination is separately usable. In the instant case, subcombination IX

has separate utility such as means for creating a reconciliation profile. See MPEP

§ 806.05(d).

11. Inventions X and I, II, III, IV, V, VI, VII, VIII, IX are related as subcombinations

disclosed as usable together in a single combination. The subcombinations are distinct

if they do not overlap in scope and are not obvious variants, and if it is shown that at

least one subcombination is separately usable. In the instant case, subcombination X

has separate utility such a user interface. See MPEP § 806.05(d).

Art Unit: 3627

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

- 12. Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:
 - (a) the inventions have acquired a separate status in the art in view of their different classification;
 - (b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;
 - (c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);

Art Unit: 3627

(d) the prior art applicable to one invention would not likely be applicable to

another invention;

(e) the inventions are likely to raise different non-prior art issues under 35 U.S.C.

101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must

include (i) an election of a invention to be examined even though the requirement

may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing

the elected invention.

The election of an invention may be made with or without traverse. To reserve a

right to petition, the election must be made with traverse. If the reply does not distinctly

and specifically point out supposed errors in the restriction requirement, the election

shall be treated as an election without traverse. Traversal must be presented at the time

of election in order to be considered timely. Failure to timely traverse the requirement

will result in the loss of right to petition under 37 CFR 1.144. If claims are added after

the election, applicant must indicate which of these claims are readable on the elected

invention.

If claims are added after the election, applicant must indicate which of these

claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably

distinct, applicant should submit evidence or identify such evidence now of record

showing the inventions to be obvious variants or clearly admit on the record that this is

the case. In either instance, if the examiner finds one of the inventions unpatentable

Art Unit: 3627

over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.

103(a) of the other invention.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to LUNA CHAMPAGNE whose telephone number is

(571)272-7177. The examiner can normally be reached on Monday - Friday 8:30 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Florian Zeender can be reached on (571) 272-6790. The fax phone number

for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
